Announcement of CEF Telecom Call 2017

Leonardo Flores Añover
Senior Expert - High Performance Computing and Quantum Technologies
DG CONNECT
European Commission
Connecting Europe Facility: One instrument - three sectors

Infrastructure programme to support the establishment of trans-European networks to reinforce an interconnected Europe

CEF €27.4 billion

Transport 22.4 billion

Energy 4.7 billion

Telecom 0.3 billion

CEF Telecom: The deployment of Digital Service Infrastructures for the development and smooth functioning of the Digital Single Market by making it work in practice:

• enabling the delivery of networked trans-European interoperable services for citizens, businesses and/or governments
• while supporting the vision of public services being not only digital by default but also cross-border by default
Priority: to exploit public data and supercomputers as a first step to establish a new generation of Digital Service Infrastructures (DSIs)

Public service demonstrating the value of combining (public) open data (including but not limited to ODP) and HPC in (existing or new) areas of public domain/interest

Outcome: "proof of concept" projects demonstrating the need for HPC in the public domain (widening use of HPC)

Important points:

- demonstrate the access to supercomputing resources
- identify the link to the (European) Open Data Portal(s)
- ensure that generated data/metadata is conformant /interoperable with the targeted public services standards (upload onto related Open Data portals and the European Data portal)
## Indicative timeline and budget
