

Press release
For release: 03/02/2011

A new web site for the PRACE Research Infrastructure

The Partnership for Advanced Computing in Europe, PRACE, has opened a new website.

With the new website, www.prace-ri.eu, the PRACE Research Infrastructure is delivering information about the service it operates for both academic and industrial communities across Europe, in the field of HPC (High Performance Computing), how to access the services, results of the use of the infrastructure and services and user support activities and community engagements.

The website is to be the focal point for the European research communities depending on HPC for their success with a special emphasis on PRACE HPC resources, results of their usage and community activities. The website is an integral part of PRACE's efforts to assist European researchers and engineers in their quest to retain and enhance international leadership and strengthen the competitiveness of European industry and intended to provide all the needed information about PRACE.

More information: www.prace-ri.eu

About PRACE: The Partnership for Advanced Computing in Europe (PRACE) is an international nonprofit association with its seat in Brussels. The PRACE Research Infrastructure (RI) provides a persistent world-class High Performance Computing (HPC) service for scientists and researchers from academia and industry. The PRACE leadership systems form the apex of the performance pyramid and are well integrated into the European HPC ecosystem. The preparation and implementation of the PRACE RI receive EC funding under grants RI-211528 and FP7-261557.
